

## ASX Release

Monday, 22 April 2013

### **REDBANK PROJECT PTY LTD – LAND AND ENVIRONMENT COURT JUDGEMENT CONCERNING MT THORLEY WARKWORTH MINE**

Redbank Energy Limited (ASX: AEJ) has received a number of enquiries in relation to the impact of the Land and Environment Court judgment (**Judgment**) regarding the proposed extension at the Mt Thorley Warkworth mine. Redbank Energy Limited's sole source of information regarding the Judgment is via media reports and the Judgment itself.

Redbank Energy Limited's wholly owned subsidiary Redbank Project Pty Limited ("**Redbank Project**"), the owner and operator of the Redbank Power Station, is supplied with coal and beneficiated dewatered mine tailings under a long term contract with the operator of the Mt Thorley Warkworth mine.

Redbank Energy Limited is aware of media reports suggesting that the owner of the Mt Thorley Warkworth mine is reviewing the viability of the mine following the Judgment which overturned the approval for the extension of the mine. However, Redbank Energy Limited has not received any communication from the mine owner regarding the impact of the Judgment and has no additional information that suggests that the mine owner will not continue to supply fuel in accordance with its agreements with Redbank Project.
